### **Notes**

### **Accounting principles**

The financial statements of the bank are made in accordance with the regulations on bookkeeping and credit institution law, statute (150/2007) on financial statements and consolidated financial statements issued by the Ministry of Finance, as well as standard 3.1 of the Financing Supervisory Authority.

### Consolidated financial statements

The subsidiaries of the bank are real estate companies and the bank does not have any associates or joint ventures. According to section 155 of the credit institution law, subsidiaries, holding companies and joint ventures whose balance value is less than 1 per cent of the parent bank value and less than 10 million euros can be excluded from the consolidated financial statements. The subsidiaries do not have a significant impact on the Group's result and balance sheet, which is why the financial statements of the bank provide a correct and adequate picture of the operative result and economic state of the Group.

### Foreign currency entries

Assets and liabilities bound to foreign currencies outside the EU are transferred to euros in accordance with the medium rate quoted by the European Central Bank on the day of closing the accounts.

The differences in currency rates emerged from valuation are entered in the income statement in Net gains (losses) on trading in foreign currencies.

### **Financial instruments**

### **Classification**

Financial assets are classified in the financial statements in four valuation categories in accordance with standard 3.1 of the Financing Supervisory Authority.

- Financial assets entered to fair value with impact on the income
- Available-for-sale financial assets
- Investment assets to be kept till due date
- Loans and other assets

The financial assets recorded at fair value through profit and loss consist of compound instruments which contain an embedded derivative that has not been separated from the main contract and other financial assets recorded at fair value through profit and loss. In addition, derivatives which have been made for the purpose of hedging but to which hedge accounting is not applied have been classified in this class.

The category of loans and other assets contains assets with fixed or definable payments that are not quoted on the market.

Available-for-sale financial assets contain assets that have not been classified in the valuation categories mentioned above.

Acquisition and sales of financial assets have been entered in the bookkeeping in accordance with the spot date, and are contained in the balance units-based debt securities, shares and interests.

Financial liabilities are divided into two valuation categories:

- Liabilities held for transactions
- Other financial liabilities

Derivative contracts to which hedge accounting is not applied and the fair value of which is negative are classified in available-for-sale financial liabilities. The bank does not possess other liabilities available for sale. All financial liabilities are thus classified under other financial liabilities.

### Valuation

Financial assets are entered in the balance sheet either to their fair value or periodic acquisition cost. With the exception of derivative instruments, financial liabilities are carried at amortised cost.

Changes in the fair value of financial assets entered to fair value with impact on income are entered in the financial statement unit Net gains (losses) on trading in securities.

Available-for-sale financial assets are appraised to their fair value. The changes to their fair value adjusted with taxes are recorded in the fair value reserve under equity. Currency gains and losses originating from foreign currency based units are not entered in the fair value reserve but directly to earnings instead. The change of value accrued in the fair value reserve is entered in the earnings when a property unit belonging to available-for-sale financial assets is sold or otherwise written out of the balance sheet.

The year's final buying rate has been considered to be the fair value of quoted shares. Their acquisition cost has been regarded as the fair value for other than quoted shares when there are no reliable means to define the fair value. If the claim certificate has a quotation, the year's final buying rate has been considered to be the fair value of the claim or, when missing, the current value of the claim discounted by the market interest rate of the capital or interest flow, or a value calculated by using some other publicly approved valuation model or method.

If there has been objective proof of the depreciation, investment assets to be retained till the due date as well as loans and other claims are appraised at the periodical acquisition or acquisition cost deducted by the value depreciation loss.

The shares and interest of subsidiary and holding companies are entered in the acquisition cost or acquisition cost deducted by value depreciation loss in the event that the depreciation is considered significant or long-term.

### Derivative contracts and hedge accounting

Derivative contracts in the financial statements are appraised at their fair value, and changes in the value are entered in the balance sheet and income statement.

The bank hedges its interest risk from changes in the fair value and applies fair value hedging to it. The hedging is applied to fixed-rate borrowing. The change in the fair value of derivatives protecting the fair value is entered in the income statement unit of Net income from the hedge accounting.

In protecting the fair value, the subject of protection is also appraised to the fair value for the protected period, even if otherwise appraised at the periodical acquisition cost. The change in the fair value of the subject of protection is entered in the balance sheet as an adjustment of the item in question and in the income statement in Net income from the hedge accounting. The hedging derivative interest is presented as adjustment of interest expenses.

The bank also uses derivatives to operatively hedge its interest risk but does not apply hedge accounting to them. In accounting, these derivatives are treated as derivatives held for sale, and the change in their fair value is entered directly to the item Net gains (losses) on trading in securities of the income statement. Interest is recorded in interest income.

### Material and immaterial goods

Properties and their shares are divided on the basis of their purpose into real estate in own use and investment property. The division is based on the square metres used.

Properties are entered in the balance sheet with acquisition cost deducted by planned depreciation write-off. The shares and interest of real estate communities are entered in the balance sheet in acquisition cost. The bank does not apply the possibility defined in section 153 of the Credit Institution Act to evaluate the investment property to fair value.

The balance values of properties in own use and shares and interest of real estate communities are based on the value of the goods in relation to the income expectations in relation to the actual operations.

The difference between the book value of investment property and the shares of real estate communities and the permanently lower likely assignment price is, in case it is significant, entered in value depreciation loss as an expense in the net income from investment property. Potential cancellations of value depreciations are entered as adjustments of the same unit.

All investment property resorts of the bank are estimated case-specifically using the trading price method together with a local expert. The fair values of investment property are presented in note 2.8.

In earlier years, revaluation has been applied to some real estates and investment property shares on the basis of experts' opinions and the approval of the Financial Supervisory Authority. In the event that the value of the property with increased value has dropped below the booking value, or if the property or part of it has been assigned or destroyed, the revaluation is cancelled accordingly. No depreciation write-off is made from revaluations. No imputable tax debt is entered from revaluations. If the imputable tax debt is significant, it is reported in the notes.

### **Appropriations**

### <u>Depreciation difference and voluntary provisions</u>

Depreciation difference entries contain the difference between planned and realized depreciations.

The bank uses voluntary provisions such as bad debt credit loss provisions when planning taxation and the financial statements. This being the case, the amount or change of voluntary provisions do not characterise the risks of the bank.

In the bank's financial statements, the appropriations are presented without deducting the related tax debt.

### **Engagements outside the balance sheet**

Engagements outside the balance sheet comprise commitments given to a third party on behalf of a customer and irrevocable commitments given in favour of a customer.

Commitments given to a third party on behalf of a customer contain, for example, guarantees or similar guarantee engagements. The engagements are presented in the amount that the guarantee or guarantee engagement corresponds to at the moment of closing the accounts.

Irrevocable commitments given in favour of a customer are, for example, binding credit engagements, granted loans not drawn yet and unused credit limits. The engagements are presented in the amount that may result in payments at the moment of closing the accounts.

### Interest income and expenses

Interest income and expenses contain entries of all income and expenses resulting from interest-bound assets and liabilities. Interests are recorded on an accrual basis, with the exception of penalty interests, which are recorded after receiving the payment. Interests are deferred by using the method of effective interests.

Interest income and expenses also contain the difference between the acquisition price and nominal value of debts, which is deferred to the running period of the claim or debt by using the method of effective interests. A counter unit is entered as a change in a claim or debt.

Interest yield is also accrued in the bookings of claims with decreased value to the remaining value using the original effective interest rate of the contract.

### Impairment losses of financial assets

### Loans and other assets

Impairment losses contain entries from the impairment of loans and other assets, when there has been objective proof that payment is lacking from the capital or interest of the loan or other asset as well as when the guarantee does not suffice to cover the amount. Estimation of the objective proof is based on estimating the insolvency of a customer and sufficiency of the guarantee. When impairments are entered, the guarantee is evaluated to the amount that is expected to be gained at the moment of realization. The amount of impairment losses is defined as the difference between the book value of the claim and the estimated current value of the accruable incoming cash flow, by taking into account the fair value of the guarantee. The original effective interest has been used as the discount interest of a claim.

### Investment assets to be kept till due date

In the event that, on closing the accounts, objective proof has been shown that the value of a debt security classified in investments held until the due date may have declined, the debt security must undergo an impairment analysis.

If the analysis shows an impairment, for example that the credit risk of the issuer has increased, the impairment is recorded through profit and loss to the item Impairment losses on other financial assets. The amount of the impairment loss is defined as the difference between the book value of the claim and the estimated current value of the accruable future cash flows. The original effective interest has been used as the discount interest of a claim.

### Available-for-sale financial assets

In the event that, at the closing of accounts, objective proof has been shown that the value of securities classified in available-for-sale financial assets may have declined, the securities must undergo an impairment analysis. If the analysis shows impairment – e.g. the credit risk of the issuer has increased or the value of a share has decreased significantly or below the long-term acquisition cost, and the bank estimates that it cannot return the investment – the loss accrued in the fair value reserve is entered with impact on the income to the unit Net income from available-for-sale financial assets.

As comes to claim certificates, the amount of impairment loss is defined as the difference between the book value of the claim and the estimated current value of the accruable incoming cash flow. The original effective interest has been used as the discount interest of a claim. The cancellation of the impairment losses of claim certificates are entered with impact on the income. The amount of the impairment losses of shares and interest is estimated as the difference between their book value and the value that the bank estimates not to receive. The impairment losses of shares cannot be cancelled with impact on the income, and the change in the value is entered in the fair value reserve.

### **Depreciation principles**

The acquisition cost of buildings and other material and immaterial goods is depreciated on the basis of the economic holding period, in accordance with the depreciation plan as straight-line depreciations. Depreciation periods range from 16 to 30 years for buildings and their parts, and 3 to 8 years for machinery and equipment. Land areas are not subject to depreciation.

The development costs of software programs and licences are activated in Immaterial Rights and depreciated in 3 to 5 years. Long-term expenses are depreciated over their useful lives, which is 5 to 10 years.

### Income and expenses other than those from ordinary activities and statutory provisions

The bank and the group have not recorded any statutory provisions or income and expenses other than those from ordinary activities.

### **Taxes**

Income taxes are entered in the bank's financial statements on the basis of taxable income. Of a positive change in the value contained in the fair value reserve, the imputable tax debt is entered on the balance sheet. Of a negative change in the value, the imputable tax claim is entered. Other deferred taxes have not been recorded.

### **Comparability of financial statements**

The changes in the fair value of cash-flow-hedging derivatives and available-for-sale financial assets recorded in the fair value reserve are presented adjusted with deferred taxes. Previously, of the total amount of the fair value reserve, only the imputable tax debt was recorded. The change in the method of recording deferred taxes does not have a significant effect on the comparability of the consolidated financial statements.

#### 2.16 Subordinated liabilities

#### 1) Subordinated liabilities

whose book value exceeds 10% of the total value of liabilities

Identification data of the liabilities	Book value	Interest %	Due date
Savings banks' debenture I. 09 - 14	1 200 000,00	3,00	18 May 2014
Savings banks' debenture I. 10 - 15	2 000 000,00	3,25	18 May 2015
Savings banks' debenture I. 11 - 16	3 000 000,00	3,50	16.5.2016
Total	6 200 000.00		

All liabilities are reported as euros. The reported liabilities are counted among solvency calculations as lower secondary credit institution-respective assets.

#### Terms of prepayment:

The bank retains the right of redemption with regard to all loans wholly or partially, prior to the due date. However, prepayment is possible only on permission from the Finnish Financial Supervisory Authority except for

minor redemptions, which the bank resells within a short period of redemption.

Regulations concerning subordination of liabilities or the potential change of liabilities to shares:

The loans are issued as subordinated debt in accordance with the law on promissory notes (622/47) §34. The loans are

subordinate in comparison to other liabilities of the issuer.

## 2) All liabilities mentioned above subordinate to other liabilities of the credit institution

	Subordinate debts	Total liabilities
Total sum of liabilities	800 000,00	800 000,00

### 2.17 Deferred tax liabilities and assets

Deferred tax liabilities and assets are recorded on the change in the fair value of available-for-sale financial assets in the fair value reserve. Other deferred tax liabilities and assets have not been recorded on the bank's balance sheet.

Deferred tax liability has been entered in the consolidated financial statements on optional provisions and depreciation differences.

Total	234 515 355,29	234 515 355,29	212 334 065,56	212 334 065,56

The fair values of financial asset have primarily been made using quoted market values. If the quoted market value has not been available, the valuation has been based on

the current value discounted with market interest rate or other commonly accepted valuation model or method. For the fair value of other financial assets, the book value has been used .

For the fair value of financial liabilities, the book value has been used.

### Essential financial assets evaluated to acquisition cost instead of fair value

Shares and interests are evaluated to acquisition cost in companies considered essential for the operation, which are described in detail

in notes 5.2. Shares and interests considered essential for the operation are meant to be kept in permanent possession.

The fair value of these ownerships cannot be defined in a reliable manner.

### 2.21 Equity increase and decrease during accounting period

	Accounting peri- od	Increase	Decrease	Accounting period

### 7.7 Imputed operative risk

	Parent com- pany 2011	2010	2009	Minimum amount of own assets
Total gross income	6 773 305,06	6 123 979,31	6 337 494,27	961 738,93
Income indicator	1 015 995,76	918 596,90	950 624,14	
	2010	2009	2008	Minimum amount of own assets
Total gross income	6 123 979,31	6 337 494,27	7 275 708,79	986 859,12
Income indicator	918 596,90	950 624,14	1 091 356,32	

The income indicator is calculated according to the basic method presented in standard 4.3i of the Financial Supervisory Authority.

Minimum amount of own assets = sum of positive annual income indicators divided by the number of years with a positive indicator.

Operative risks refer to the risk of loss potentially caused by inadequate or insufficient internal processes, personnel, systems or external factors.

## Tilinpäätöksen ja toimintakertomuksen allekirjoitus
