Notes

Accounting principles

The financial statements of the bank are made in accordance with the regulations on bookkeeping and credit institution law, statute (150/2007) on financial statements and consolidated financial statements issued by the Ministry of Finance, as well as standard 3.1 of the Financing Supervisory Authority.

Consolidated financial statements

The subsidiaries of the bank are real estate companies and the bank does not have any associates or joint ventures. According to section 155 of the credit institution law, subsidiaries, holding companies and joint ventures whose balance value is less than 1 per cent of the parent bank value and less than 10 million euros can be excluded from the consolidated financial statements. The subsidiaries do not have a significant impact on the Group's result and balance sheet, which is why the financial statements of the bank provide a correct and adequate picture of the operative result and economic state of the Group.

Foreign currency entries

Assets and liabilities bound to foreign currencies outside the EU are transferred to euros in accordance with the medium rate quoted by the European Central Bank on the day of closing the accounts.

The differences in currency rates emerged from valuation are entered in the income statement in Net gains (losses) on trading in foreign currencies.

Financial instruments

Classification

Financial assets are classified in the financial statements in four valuation categories in accordance with standard 3.1 of the Financing Supervisory Authority.

- Financial assets entered to fair value with impact on the income
- Available-for-sale financial assets
- Investment assets to be kept till due date
- Loans and other assets

The financial assets recorded at fair value through profit and loss consist of compound instruments which contain an embedded derivative that has not been separated from the main contract and other financial assets recorded at fair value through profit and loss. In addition, derivatives which have been made for the purpose of hedging but to which hedge accounting is not applied have been classified in this class.

The bank does not possess investment assets to be retained till the due date.

The category of loans and other assets contains assets with fixed or definable payments that are not quoted on the market.

Available-for-sale financial assets contain assets that have not been classified in the valuation categories mentioned above.

Acquisition and sales of financial assets have been entered in the bookkeeping in accordance with the spot date, and are contained in the balance units-based debt securities, shares and interests.

Financial liabilities are divided into two valuation categories:

- Liabilities held for transactions
- Other financial liabilities

Derivative contracts to which hedge accounting is not applied and the fair value of which is negative are classified in available-for-sale financial liabilities. The bank does not possess liabilities held for transactions. All financial liabilities are thus classified under other financial liabilities.

Valuation

Financial assets are entered in the balance sheet either to their fair value or periodic acquisition cost. With the exception of derivative instruments, financial liabilities are carried at amortised cost.

Changes in the fair value of financial assets entered to fair value with impact on income are entered in the financial statement unit Net gains (losses) on trading in securities.

Available-for-sale financial assets are appraised to their fair value. The changes to their fair value adjusted with taxes are recorded in the fair value reserve under equity. Currency gains and losses originating from foreign currency based units are not entered in the fair value reserve but directly to earnings instead. The change of value accrued in the fair value reserve is entered in the earnings when a property unit belonging to available-for-sale financial assets is sold or otherwise written out of the balance sheet.

The year's final buying rate has been considered to be the fair value of quoted shares. Their acquisition cost has been regarded as the fair value for other than quoted shares when there are no reliable means to define the fair value. If the claim certificate has a quotation, the year's final buying rate has been considered to be the fair value of the claim or, when missing, the current value of the claim discounted by the market interest rate of the capital or interest flow, or a value calculated by using some other publicly approved valuation model or method.

The shares and interest of subsidiary and holding companies are entered in the acquisition cost or acquisition cost deducted by value depreciation loss in the event that the depreciation is considered significant or long-term.

Derivative contracts and hedge accounting

Derivative contracts in the financial statements are appraised at their fair value, and changes in the value are entered in the balance sheet and income statement.

The bank hedges its interest risk from changes in the fair value and applies fair value hedging to it. The hedging is applied to fixed-rate borrowing. The change in the fair value of derivatives protecting the fair value is entered in the income statement unit of Net income from the hedge accounting. In protecting the fair value, the subject of protection is also appraised to the fair value for the protected period, even if otherwise appraised at the periodical acquisition cost. The change in the fair value of the subject of protection is entered in the balance sheet as an adjustment of the item in question and in the income statement in Net income from the hedge accounting. The hedging derivative interest is presented as adjustment of interest expenses.

The bank also uses derivatives to operatively hedge its interest risk but does not apply hedge accounting to it. In accounting, these derivatives are treated as derivatives held for sale, and the change in their fair value is entered directly to the item Net gains (losses) on trading in securities of the income statement. Interest is recorded in interest income.

Material and immaterial goods

Properties and their shares are divided on the basis of their purpose into real estate in own use and investment property. The division is based on the square metres used.

Properties are entered in the balance sheet with acquisition cost deducted by planned depreciation write-off. The shares and interest of real estate communities are entered in the balance sheet in acquisition cost. The bank does not apply the possibility defined in section 153 of the Credit Institution Act to evaluate the investment property to fair value.

The balance values of properties in own use and shares and interest of real estate communities are based on the value of the goods in relation to the income expectations in relation to the actual operations.

The difference between the book value of investment property and the shares of real estate communities and the permanently lower likely assignment price is, in case it is significant, entered in value depreciation loss as an expense in the net income from investment property. Potential cancellations of value depreciations are entered as adjustments of the same unit.

The bank's key investment property items are evaluated using the purchase price method for each property together with a local expert. The fair values of investment property are presented in Note 2.8.

In earlier years, revaluation has been applied to some real estates and investment property shares on the basis of experts' opinions and the approval of the Financial Supervisory Authority. In the event that the value of the property with increased value has dropped below the booking value, or if the property or part of it has been assigned or destroyed, the revaluation is cancelled accordingly. No depreciation write-off is made from revaluations. No imputable tax debt is entered from revaluations. If the imputable tax debt is significant, it is reported in the notes.

Appropriations

Voluntary provisions

The bank uses voluntary provisions such as bad debt credit loss provisions when planning taxation and the financial statements. This being the case, the amount or change of voluntary provisions do not characterise the risks of the bank.

In the bank's financial statements, the appropriations are presented without deducting the related tax debt.

Engagements outside the balance sheet

Engagements outside the balance sheet comprise commitments given to a third party on behalf of a customer and irrevocable commitments given in favour of a customer.

Commitments given to a third party on behalf of a customer contain, for example, guarantees or similar guarantee engagements. The engagements are presented in the amount that the guarantee or guarantee engagement corresponds to at the moment of closing the accounts.

Irrevocable commitments given in favour of a customer are, for example, binding credit engagements, granted loans not drawn yet and unused credit limits. The engagements are presented in the amount that may result in payments at the moment of closing the accounts.

Interest income and expenses

Interest income and expenses contain entries of all income and expenses resulting from interest-bearing assets and liabilities. Interests are entered on an accrual basis except for penalty interests, which are entered after receiving the payment. Interests are deferred by using the method of effective interests.

Interest income and expenses also contain the difference between the acquisition price and nominal value of claims and debts, which is amortised to the running period of the claim or debt using the effective interest method. A counter unit is entered as a change in a claim or debt.

Interest yield is also accrued in the bookings of claims with decreased value to the remaining value using the original effective interest rate of the contract.

Impairment losses of financial assets

Loans and other assets

Impairment losses contain entries from the impairment of loans and other assets, when there has been objective proof that payment is lacking from the capital or interest of the loan or other asset as well as when the guarantee does not suffice to cover the amount. Estimation of the objective proof is based on estimating the insolvency of a customer and sufficiency of the guarantee. When impairments are entered, the guarantee is evaluated to the amount that is expected to be gained at the moment of realization. The amount of impairment losses is defined as the difference between the book value of the claim and the estimated current value of the accruable incoming cash flow, by taking into account the fair value of the guarantee. The original effective interest has been used as the discount interest of a claim.

Investment assets to be kept till due date

In the event that, on closing the accounts, objective proof has been shown that the value of a debt security classified in investments held until the due date may have declined, the debt security must undergo an impairment analysis.

If the analysis shows an impairment, for example that the credit risk of the issuer has increased, the impairment is recorded through profit and loss to the item Impairment losses on other financial assets. The amount of the impairment loss is defined as the difference between the book value of the claim and the estimated current value of the accruable future cash flows. The original effective interest has been used as the discount interest of a claim.

Available-for-sale financial assets

In the event that, at the closing of accounts, objective proof has been shown that the value of securities classified in available-for-sale financial assets may have declined, the securities must undergo an impairment analysis. If the analysis shows impairment – e.g. the credit risk of the issuer has increased or the value of a share has decreased significantly or below the long-term acquisition cost, and the bank estimates that it cannot return the investment – the loss accrued in the fair value reserve is entered with impact on the income to the unit Net income from available-for-sale financial assets.

As comes to claim certificates, the amount of impairment loss is defined as the difference between the book value of the claim and the estimated current value of the accruable incoming cash flow. The original effective interest has been used as the discount interest of a claim. The cancellation of the impairment losses of claim certificates are entered with impact on the in-

come. The amount of the impairment losses of shares and interest is estimated as the difference between their book value and the value that the bank estimates not to receive. The impairment losses of shares cannot be cancelled with impact on the income, and the change in the value is entered in the fair value reserve.

Depreciation principles

The acquisition cost of buildings and other material and immaterial goods is depreciated on the basis of the economic holding period, in accordance with the depreciation plan as straight-line depreciations. Depreciation periods range from 16 to 30 years for buildings and their parts, and 3 to 8 years for machinery and equipment. Land areas are not subject to depreciation.

The development costs of software programs and licences are activated in Immaterial Rights and depreciated in 3 to 5 years. Long-term expenses are depreciated over their useful lives, which is 5 to 10 years.

Income and expenses other than those from ordinary activities and statutory provisions

The bank and the group have not recorded any statutory provisions or income and expenses other than those from ordinary activities.

Taxes

Income taxes are entered in the bank's financial statements on the basis of taxable income. Of a positive change in the value contained in the fair value reserve, the imputable tax debt is entered on the balance sheet. Of a negative change in the value, the imputable tax claim is entered. In addition, an imputable tax claim has been recorded on the negative value change transferred from the fair value reserve to income. Other deferred taxes have not been recorded.

Cash and cash equivalents

The cash and cash equivalents of the funds statement comprise cash in hand and receivables from credit institutions paid on demand. The funds statement has been prepared using the indirect method.

1) Subordinated liabilities

whose book value exceeds 10% of the total value of liabilities

Identification data of the liabilities	Book value	Interest %	Due date
S.b.deb. I / 2010	1 500 000,00	3,25	18 May 2015
S.b.deb. I / 2011	2 400 000,00	3,50	16 May 2016
S.b.deb.I / 2012	3 000 000,00	2,85	7.5.2017
S.b.deb..II /2009	800 000,00	3,00	18 May 2014
Total	7 700 000,00		

Amount counted among own assets

S.b.deb. I / 2010	1 500 000,00
S.b.deb. I / 2011	2 400 000,00
S.b.deb.I / 2012	3 000 000,00
S.b.deb.II /2009	800 000,00
Total	7 700 000,00

All liabilities are reported as euros. The reported liabilities are counted among solvency calculations as lower secondary credit institution-respective assets.

Terms of prepayment:

The bank reserves the right of redemption with regard to all loans wholly or partially, prior to the due date. However, prepayment is possible only on permission from the Finnish Financial Supervisory Authority, except for minor redemptions which the bank resells within a short period from redemption.

Regulations concerning subordination of liabilities or the potential change of liabilities to shares:

The loans are issued as subordinated debt in accordance with the law on promissory notes (622/47) §34. The loans are subordinate in comparison to other liabilities of the issuer.

2) All liabilities mentioned above subordinate to other liabilities of the credit institution

	Subordinate debts	Total liabilities
Total sum of liabilities	200 000,00	200 000,00

2.17 Deferred tax liabilities and assets

Deferred tax liabilities and assets are recorded on the changes in the fair value of available-for-sale financial assets recorded in the fair value reserve.

Other deferred tax liabilities and assets have not been recorded on the bank's balance sheet.

Total	245 209 533,87	245 209 533,87	234 515 355,29	234 515 355,29

The fair values of financial asset have primarily been made using quoted market values. If the quoted market value has not been available, the valuation has been based on the current value discounted with market interest rate or other commonly accepted valuation model or method. For the fair value of other financial assets, the book value has been used .
For the fair value of financial liabilities, the book value has been used.

Essential financial assets evaluated to acquisition cost instead of fair value

Shares and interests are evaluated at acquisition cost in companies considered essential for the operations, which are described in more detail in Note 5.2. Shares and interests considered essential for the operation are meant to be kept in permanent possession.
The fair value of these ownerships cannot be defined in a reliable manner.

The financial assets mentioned above have been sold to the value of EUR 3,000 during the financial period.

Total engagements outside the balance sheet	13 190 363,23	14 483 492,54

The bank has issued an absolute guarantee to Aktia Real Estate Mortgage Bank plc on behalf of itself and other savings banks included in the transfer contract on the compensation of potential mortgage loan losses to Aktia Real Estate Mortgage Bank plc.

The amount of guarantee liabilities is restricted.

The bank has given an absolute guarantee to Aktia Bank p.l.c. to the benefit of all other savings banks who have signed an identical payment transactions account contract with Aktia Bank p.l.c. The guarantee concerns the receivables that may be generated to Aktia Bank p.l.c. by breaching the terms and conditions of the payment transactions account agreement.

The amount of guarantee liabilities is restricted.

3.5 Other off-balance sheet arrangements

The bank belongs to the VAT group of Oy Samlink Ab.

Common liabilities related to the group VAT registration	884 897,32	561 633,42
--	------------	------------

The Finnish Savings Banks Association represents the savings banks to Visa Europe. With the transfer of Luottokunta's business operations to Luottokunta Oy (today Nets Oy) on 1 April 2012, and with the membership type of Luottokunta Oy changing to Principal Member membership, the membership of the Finnish Savings Banks Association changed to Associate Member membership.

The Finnish Savings Banks Association as a member of Visa Europe is principally responsible for any damage generated in the card business and for following the membership agreement and Visa's rules. Based on the membership agreement, Visa Europe may impose on the Association compensation claims for breaching the contract and the rules.

Since the savings banks are responsible for all business operations related to Visa cards, they are also eventually responsible for any compensation to Visa Europe.

OTHER NOTES

6.1 Trustee operations provided by the credit institution

Property management services provided by the credit institution

The bank provides services in accordance with those referred to in section 5 of the law on investment service companies, such as realisation and transfer of assignments, to deal for its own account, property management, investment consultation, safekeeping and management of financial instruments as defined in Section 15, as well as safety deposit and related services.

The bank does not provide so-called full-service property management.

Loans and advances to credit institutions and investment service companies	27 320 414,50	1 228,20	0,00	0,00	27 319 186,30
Total other liability groups	28 995 586,16	2 712 263,00	642 775,28	4 217 555,36	21 422 992,52
Maturity claims	1 339 230,85	682 385,50	350 066,12	301 874,94	4 904,29
Total	275 910 440,73	116 980 328,63	23 893 045,84	77 980 318,45	57 056 747,81

*) The table shows the four largest liability groups and maturity claims; other liability groups are summed up in one unit, Total other liability groups.

7.7 Imputed operative risk

	Parent			
	2012	2011	2010	Minimum amount of own assets
Total gross income	6 114 909,16	6 773 305,06	6 123 979,31	
Income indicator	917 236,37	1 015 995,76	918 596,90	950 609,68
	2011	2010	2009	Minimum amount of own assets
Total gross income	6 773 305,06	6 123 979,31	6 337 494,27	
Income indicator	1 015 995,76	918 596,90	950 624,14	961 738,93

The income indicator is calculated according to the basic method presented in standard 4.3i of the Financial Supervisory Authority.

Minimum amount of own assets = sum of positive annual income indicators divided by the number of years with a positive indicator.

Operative risks refer to the risk of loss potentially caused by inadequate or insufficient internal processes, personnel, systems or external factors.
